David E Graybill  
 Primary Examiner  
 Art Unit: 2822

The following is an examiner's statement of reasons for allowance: The prior art does not teach the claimed invention as a whole, including disposing a first transistor comprising at least one first transistor component within the second well, the first transistor adapted to employ a first type of channel having a quiet voltage: source connected to a body thereof; and, capacitively coupling a n-type transistor with said transistor layer to said shielding layer; and capacitively coupling said shielding layer to said substrate layer, said capacitively coupled shielding layer reducing the noise transferred to said substrate layer of the chip.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
